

**Take an online course in 2020 taught by Andrew F. Hayes on the use of PROCESS.**

**Participants in any of these courses will receive a beta version of PROCESS for R before it is released to the public near the end of 2020.**

**Mediation, Moderation, and Conditional Process Analysis.** This course will be offered starting July 6-Aug 3 2020 **online** and **on demand** through **Statistical Horizons** and will emphasize the use of PROCESS for SPSS, SAS, and R. Content will be equivalent to the 2-day in person course frequently offered by Statistical Horizons. Participants can progress through the course material at whatever pace is comfortable. Content will be delivered asynchronously through prerecorded video. A discussion board for interacting with Andrew Hayes and other participants in the course is available through the course portal. Details and registration information are available [www.statisticalhorizons.com](http://www.statisticalhorizons.com)

**Mediation, Moderation, and Conditional Process Analysis: A Second Course.** This course will be offered starting August 24-Sept 21 2020 **online** and **on demand** through **Statistical Horizons** and will emphasize the use of PROCESS for SPSS, SAS, and R. Content will be delivered asynchronously through prerecorded video. A discussion board for interacting with Andrew Hayes and other participants in the course is available through the course portal.. Details and registration information are available [www.statisticalhorizons.com](http://www.statisticalhorizons.com)

Both of these courses are available for private delivery in online format to your research group or university at a group discount (5 or more participants). Contact Andrew Hayes at [workshop@processmacro.org](mailto:workshop@processmacro.org) for fees and details. In-person version of these courses are not being offered during the novel coronavirus pandemic.
