THE PSYCHOLOGY OF LEARNING: A STUDENT WORKBOOK

Armando Machado
University of Minho

Francisco J. Silva
University of Redlands

Foreword by William Timberlake (Indiana University)
To Orlando, my friend.

AM

To Joe Pear, Bob Tait, and Steve Holborn for showing me the light, and Bill Timberlake for making it brighter.

FJS
CONTENTS

Foreword vi
Preface x

1 Learning and Variables 1
   The goal of studying learning 1
   Behavior is lawful 1
   Independent, dependent, and confounding variables 1
   Operational definitions 2
   Exercises 3

2 Graphs and Functions 7
   Functional relations 7
   Drawing graphs 7
   Common functional relations (shapes of curves) 10
      Linear relations 10
      Positively accelerating relations 11
      Negatively accelerating relations 12
   Exercises 13

3 Habituation and Its Properties 23
   What is habituation? 23
   Illustrating habituation in a graph 23
   Properties of habituation 23
      Spontaneous recovery from habituation 24
      Relearning effect 24
      Interstimulus interval (ISI) effect 24
      Stimulus intensity effect 24
      Stimulus generalization and stimulus specificity of habituation 24
   Exercises 24

4 Basic Principles of Pavlovian Conditioning 31
   Pavlovian conditioning 31
   Pavlovian extinction 32
   Spontaneous recovery of a conditional response 32
   (Conditional) stimulus generalization 32
   (Conditional) stimulus discrimination 32
   Exercises 32
5 Complexities of Pavlovian Conditioning 41
Contingency in Pavlovian conditioning 41
Conditioned suppression and suppression ratios 41
How are excitors, inhibitors, and neutral stimuli related to conditioned suppression? 42
Exercises 43

6 The Rescorla-Wagner Model: The Basics 51
The Rescorla-Wagner model 51
Unconditional stimulus 51
Conditional stimulus 51
The learning process 52
Exercises 54

7 The Rescorla-Wagner Model: Advanced Issues 61
Introduction 61
Exercises 61

8 Reinforcement 71
Amount and quality of reinforcement 71
Motivation 71
Delay of reinforcement 71
Premack’s principle 71
Response deprivation hypothesis 72
Behavioral bliss points 72
Exercises 73

9 “Creating” Behavior: Shaping 81
Shaping 81
Successive approximations 81
Interplay between reinforcement and extinction 82
Exercises 82

10 Schedules of Reinforcement 91
What are schedules of reinforcement? 91
The importance of schedules of reinforcement 91
Types of schedules of reinforcement 92
Distinguishing ratio schedules from interval schedules 92
Fixed schedules differ from variable schedules of reinforcement 92
Feedback functions 92
Cumulative records 95
Exercises 95

11 Punishment, Escape, and Avoidance 103
Two-process theory and negative reinforcement 103
12 “Simple” Stimulus Control 113
Stimulus control 113
Pavlovian stimulus discrimination 113
Operant stimulus discrimination 114
Stimulus generalization 114
Peak shift 115
Excitatory and inhibitory generalization gradients 115
Exercises 116

13 “Complex” Stimulus Control 127
“Complex” stimulus control 127
Memory 127
  Delayed matching-to-sample (DMTS) 127
  Radial-arm maze 128
Concepts 129
Temporal discrimination (“timing”) 129
Numerical discrimination 130
Exercises 130

14 Choice and Preference: The Basics of the Matching Law 143
What is the matching law? 143
Exercises 144

15 Extensions of the Matching Law 155
Deviations from matching 155
Exercises 155
